Errata Slip

In the paper "Separating Web Applications from User Data Storage with BSTORE," by Ramesh Chandra, Priya Gupta, and Nickolai Zeldovich, MIT CSAIL (Wednesday session 10:30–noon, pp. 1–13 of the Proceedings), corrections are needed to Tables 1 and 2, p. 4:

Table 1: The get call should read "get(fh)" and should return on success "ver, data." The getacl call should return on success "delegation list."

Table 2: The get call should read "get(fh, acltagset)" and should return on success "ver, data."
