

# 2010 USENIX Annual Technical Conference

June 23–25, 2010

Boston, MA, USA

Message from the Program Co-Chairs. . . . . vii

## Wednesday, June 23

### 10:30–Noon

DEFCON: High-Performance Event Processing with Information Security . . . . . 1  
*Matteo Migliavacca and Ioannis Papagiannis, Imperial College London; David M. Ebers, University of Cambridge; Brian Shand, CBCU, Eastern Cancer Registry, National Health Service UK; Jean Bacon, Computer Laboratory, University of Cambridge; Peter Pietzuch, Imperial College London*

Wide-Area Route Control for Distributed Services. . . . . 17  
*Vytautas Valancius and Nick Feamster, Georgia Institute of Technology; Jennifer Rexford, Princeton University; Akihiro Nakao, The University of Tokyo*

LiteGreen: Saving Energy in Networked Desktops Using Virtualization . . . . . 31  
*Tathagata Das, Microsoft Research India; Pradeep Padala, DOCOMO USA Labs; Venkat Padmanabhan and Ram Ramjee, Microsoft Research India; Kang G. Shin, The University of Michigan*

### 2:00–3:00

Stout: An Adaptive Interface to Scalable Cloud Storage. . . . . 47  
*John C. McCullough, University of California, San Diego; John Dunagan and Alec Wolman, Microsoft Research, Redmond; Alex C. Snoeren, University of California, San Diego*

IsoStack—Highly Efficient Network Processing on Dedicated Cores . . . . . 61  
*Leah Shalev, Julian Satran, Eran Borovik, and Muli Ben-Yehuda, IBM Research—Haifa*

### 3:30–5:30

A Realistic Evaluation of Memory Hardware Errors and Software System Susceptibility . . . . . 75  
*Xin Li, Michael C. Huang, and Kai Shen, University of Rochester; Lingkun Chu, Ask.com*

The Utility Coprocessor: Massively Parallel Computation from the Coffee Shop . . . . . 89  
*John R. Douceur, Jeremy Elson, Jon Howell, and Jacob R. Lorch, Microsoft Research*

Apiary: Easy-to-Use Desktop Application Fault Containment on Commodity Operating Systems . . . . . 103  
*Shaya Potter and Jason Nieh, Columbia University*

Tolerating Malicious Device Drivers in Linux . . . . . 117  
*Silas Boyd-Wickizer and Nikolai Zeldovich, MIT CSAIL*

## Thursday, June 24

### 10:30–Noon

Proxychain: Developing a Robust and Efficient Authentication Infrastructure for Carrier-Scale VoIP Networks . . . . .	131
<i>Italo Dacosta and Patrick Traynor, Converging Infrastructure Security (CISEC) Laboratory, Georgia Tech Information Security Center (GTISC), Georgia Institute of Technology</i>	
ZooKeeper: Wait-free Coordination for Internet-scale Systems . . . . .	145
<i>Patrick Hunt and Mahadev Konar, Yahoo! Grid; Flavio P. Junqueira and Benjamin Reed, Yahoo! Research</i>	
Testing Closed-Source Binary Device Drivers with DDT . . . . .	159
<i>Volodymyr Kuznetsov, Vitaly Chipounov, and George Candea, École Polytechnique Fédérale de Lausanne (EPFL), Switzerland</i>	

### 1:00–3:00

A Transparently-Scalable Metadata Service for the Ursa Minor Storage System . . . . .	173
<i>Shafeeq Sinnamohideen and Raja R. Sambasivan, Carnegie Mellon University; James Hendricks, Carnegie Mellon University and Google; Likun Liu, Tsinghua University; Gregory R. Ganger, Carnegie Mellon University</i>	
FlashVM: Virtual Memory Management on Flash . . . . .	187
<i>Mohit Saxena and Michael M. Swift, University of Wisconsin—Madison</i>	
Dyson: An Architecture for Extensible Wireless LANs . . . . .	201
<i>Rohan Murty, Harvard University; Jitendra Padhye and Alec Wolman, Microsoft Research; Matt Welsh, Harvard University</i>	
ChunkStash: Speeding Up Inline Storage Deduplication Using Flash Memory . . . . .	215
<i>Biplob Debnath, University of Minnesota, Twin Cities; Sudipta Sengupta and Jin Li, Microsoft Research, Redmond</i>	

## Friday, June 25

### 10:20–Noon

Mining Invariants from Console Logs for System Problem Detection . . . . .	231
<i>Jian-Guang Lou and Qiang Fu, Microsoft Research Asia; Shenqi Yang, Beijing University of Posts and Telecom; Ye Xu, Nanjing University, P.R. China; Jiang Li, Microsoft Research Asia</i>	
Wide-area Network Acceleration for the Developing World . . . . .	245
<i>Sunghwan Ihm, Princeton University; KyoungSoo Park, University of Pittsburgh and KAIST; Vivek S. Pai, Princeton University</i>	
An Evaluation of Per-Chip Nonuniform Frequency Scaling on Multicores (Short Paper) . . . . .	259
<i>Xiao Zhang, Kai Shen, Sandhya Dwarkadas, and Rongrong Zhong, University of Rochester</i>	
A DNS Reflection Method for Global Traffic Management (Short Paper) . . . . .	265
<i>Cheng Huang, Microsoft Research; Nick Holt, Microsoft Corporation; Y. Angela Wang, Polytechnic Institute of NYU; Albert Greenberg and Jin Li, Microsoft Research; Keith W. Ross, Polytechnic Institute of NYU</i>	

### 2:00–3:00

An Analysis of Power Consumption in a Smartphone . . . . .	271
<i>Aaron Carroll, NICTA and University of New South Wales; Gernot Heiser, NICTA, University of New South Wales, and Open Kernel Labs</i>	
SleepServer: A Software-Only Approach for Reducing the Energy Consumption of PCs within Enterprise Environments . . . . .	285
<i>Yuvraj Agarwal, Stefan Savage, and Rajesh Gupta, University of California, San Diego</i>	

### 3:30–4:30

An Extensible Technique for High-Precision Testing of Recovery Code . . . . .	301
<i>Paul D. Marinescu, Radu Banabic, and George Candea, École Polytechnique Fédérale de Lausanne (EPFL), Switzerland</i>	
Sleepless in Seattle No Longer . . . . .	315
<i>Joshua Reich, Columbia University; Michel Goraczko, Aman Kansal, and Jitendra Padhye, Microsoft Research</i>
