HotOS XI

11th Workshop on Hot Topics in Operating Systems

May 7–9, 2007, San Diego, CA, USA
www.usenix.org/hotos07

Continuing the HotOS tradition, workshop attendance is limited to about 80 participants who are the leading researchers in Operating Systems. It is the top venue to present and discuss new ideas about computer systems and how technological advances and new applications are shaping our computational infrastructure.

The field of Operating Systems research is more relevant today than ever. Massively multi-core architectures, field programmable hardware, virtual machine monitors, safe languages, security, and dependability requirements are all in significant flux, while processor speeds have stagnated. Decades-old assumptions about computer architecture and the computing environment are being challenged or changing. In the context of these dramatic changes, HotOS XI will focus on new directions of research, nontraditional approaches to old (or new) ideas, and insightful discussion.

Past sponsors have included Hewlett-Packard and Microsoft Research.

The USENIX Association welcomes corporate support of our conferences. There are a variety of ways to participate as a sponsor, and we welcome the opportunity to discuss which option is best for you. Please see the sponsorship opportunities below for examples of some of the ways you can participate.

Please contact Ellie Young, Executive Director, to discuss a custom package for you: ellie@usenix.org or (510) 528-8649 ext. 18.
