Contributors to this Issue

W. Richard Stevens is Vice President of Research and Development at Health Systems International (HSI) in New Haven, Connecticut. He received the B.S.E. in Aerospace Engineering from the University of Michigan in 1973 and the Ph.D. in Systems Engineering from the University of Arizona in 1982. His research interests include computer networks and computerized typesetting. He is the author of a forthcoming book *UNIX Network Programming*. Prior to joining HSI in 1982, he was with Kitt Peak National Observatory in Tucson for seven years.

Bjarne Stroustrup is the designer and original implementor of C++ and the author of *The C++ Programming Language*. He holds a Cand. Scient. in Mathematics and Computer Science from the University of Aarhus and a Ph.D. in Computer Science from Cambridge University. His research interests include distributed systems, operating systems, simulation, programming methodology, and programming languages. Stroustrup has been at Bell Laboratories since 1979; he is currently a member of the Computer Science Research Center. Two of Stroustrup’s previous articles concerning C++ have appeared in *Computing Systems*; a fourth will appear in a future issue.
