

## *Contributors to This Issue*

*Scott Carson* received the M.S. and Ph.D. degrees from the University of Virginia in 1981 and 1984, respectively. From 1980 through 1984 he was a research Engineer at General Electric's Industrial Electronics Development Laboratory. From 1984 through 1992 he taught computer science at the Universities of Virginia and Maryland. He is currently Vice-President of Engineering at Tracer Technologies, Inc., a firm specializing in high-performance operating software for large-scale storage systems.

*Peter Honeyman* completed undergraduate studies at the University of Michigan and received the Ph.D. from Princeton University for research in relational database theory. He has been a Member of Technical Staff at Bell Labs and Assistant Professor of computer science at Princeton University. He is currently Associate Research Scientist at the University of Michigan's Center for Information Technology Integration. Honeyman has been involved in several significant software projects, including HoneyDanBer UUCP, Pathalias, MacNFS, and the Telebit UUCP spoof. His current research efforts are focused on distributed file systems, with an emphasis on mobile computing, security, and performance. He can be contacted at [honey@citi.umich.edu](mailto:honey@citi.umich.edu).

*Jeffrey C. Mogul* received a B.S. from the Massachusetts Institute of Technology in 1979, an M.S. from Stanford University in 1980, and a Ph.D. from the Stanford University Computer Science Department in 1986. Dr. Mogul has been an active participant in the Internet community and is the author or co-author of several Internet Standards. Since 1986 he has been a researcher at the Digital Equipment Corporation Western Research Laboratory, working on network and operating systems issues for high-performance computer systems. He is a member of ACM, Sigma Xi, the IEEE Computer Society, and CPSR, and he was Program Committee Chair for the Winter 1994 USENIX Technical Conference. He can be reached at [mogul@wrl.dec.com](mailto:mogul@wrl.dec.com).

*Sanjeev Setia* received the M.Sc. (Tech.) degree from BITS, Pilani, India in 1987, and the M.S. and Ph.D. degrees from the University of Maryland, College Park in 1990 and 1993, respectively. He is currently an assistant professor in the Department of Computer Science at George Mason University, Fairfax, Virginia. His

research interests are in operating systems, parallel computing, and performance analysis. He can be reached at [setia@cs.gmu.edu](mailto:setia@cs.gmu.edu).

*Brent Welch* is a member of the research staff at the Xerox Palo Alto Research Center (PARC) Computer Science Laboratory (CSL). He received his Ph.D. from the University of California, Berkeley, in 1990. While at Berkeley he was one of the original members of the Sprite project headed by Professor John Ousterhout. His current research interests include distributed systems, management of large scale distributed systems, distributed file systems, replicated data, and user interfaces. He can be reached at [welch@parc.xerox.com](mailto:welch@parc.xerox.com).
